

FOR IMMEDIATE RELEASE

FOR THE FIRST TIME, THOSE TRULY PASSIONATE ABOUT HOME THEATER CAN HAVE THE LEGENDARY CERWIN-VEGA PROFESSIONAL LINE OF ACTIVE SUBWOOFERS DESIGNED FOR THEIR HOMES.

The latest addition to the Cerwin-Vega Home Series is the home use version of the CV Pro CVA-121 and 118 bass systems used on major concert tours

Deerfield Beach, FL – January 14, 2010 – Think of all the great concerts you've been to – the ones where you felt the bass seem to reach right inside you. Did you ever wish you could put some of that true chest-thumping live-sound thunder into a home sound system? Now you can: Cerwin-Vega!, one of the world's leading manufacturers of loudspeakers and audio products for professional and home markets, today announced the introduction of two new home theater subwoofers: the CVHF-A21S and CVHF-A18S. These new CVHF subs are the same products engineered for on-stage use, so they deliver the massive, wall-shuddering low frequency experience that so many touring music artists have used to fill venues from clubs to arenas. These lease-breakers are now available with their integrated high-performance amplifier and driver intact but tuned for residential applications such as home theater and whole-house audio.

The CVHF subwoofers are packed with features that enhance the low-frequency excitement of music and movies:

- Built-in high-pass and low-pass variable filters precisely route full-range signals between the sub and the rest of the system, assuring a perfect balance between lows and the rest of the spectrum
- 18" and 21" front firing subwoofers. The 21" woofer is carbon-fiber reinforced for increased stiffness and durability
- Patented Cerwin-Vega Stroker™ technology improves cooling and further enhances reliability
- Attractive black wood grain cabinets fit into any décor
- Master/Slave Output allows for daisy-chaining multiple subs while reducing cable connections
- Cast aluminum grille protects the woofer and acts as a heatsink by reducing power compression

Specifications:

CVHF-A21S

- Frequency Response 35 Hz - 120 Hz (± 3 dB)
- Frequency Range 28 Hz - 150 Hz (-10 dB)

CVHF-A18S

- Frequency Response 36 Hz - 120 Hz (± 3 dB)
- Frequency Range 28 Hz - 150 Hz (-10 dB)

The CVHF subwoofers bring Cerwin-Vega's legendary bass reproduction, presence and power handling under your roof and under your control, for home theaters and listening environments that demand the most realistic, jaw-dropping and awe-inspiring low-frequency reproduction. CVHF delivers on the Cerwin-Vega tradition of powerful sound with an emphasis on bass. CVHF – bass you can really FEEL!
